

## AAK products in respect to ISO 16128 – Derived Natural Products

AAK position and interpretation on how products in Table 1 to 2 would be classified with respect to ISO 16128 (Guidelines on technical definitions and criteria for natural and organic cosmetic ingredients and products).

### Derived Natural ingredient:

| Product                | Natural [%] | Derived Natural [%] | Natural origin index |
|------------------------|-------------|---------------------|----------------------|
| Akofine P™             | 0           | 100                 | 1                    |
| Akofine R™             | 0           | 100                 | 1                    |
| Akogel™                | 0           | 100                 | 1                    |
| Akogel Plus™           | 0           | 100                 | 1                    |
| Akoline GC™            | 0           | 100                 | 1                    |
| Akoline LC™            | 0           | 100                 | 1                    |
| Akoline MCM™           | 0           | 100                 | 1                    |
| Akoline PG 7™          | 0           | 100                 | 1                    |
| Akoline PGPR™          | 0           | 100                 | 1                    |
| Akoline SL™            | 0           | 100                 | 1                    |
| Akosoft 36™            | 0           | 100                 | 1                    |
| LIPEX®512™             | 0           | 100                 | 1                    |
| LIPEX®Bassol C™        | 0           | 100                 | 1                    |
| LIPEX®BC™              | 0           | 100                 | 1                    |
| LIPEX®Cellest™         | 0           | 100                 | 1                    |
| LIPEX®CocoaSoft RA MB™ | 0           | 100                 | 1                    |
| LIPEX®IllipeSoft™      | 0           | 100                 | 1                    |
| LIPEX®PreAct™          | 0           | 100                 | 1                    |
| LIPEX®Shea™            | 0           | 100                 | 1                    |
| LIPEX®SheaLuxe TR™     | 0           | 100                 | 1                    |
| LIPEX®SheaSoft™        | 0           | 100                 | 1                    |
| LIPEX®SheaSoft TR™     | 0           | 100                 | 1                    |
| LIPEX®SheaSolve™       | 0           | 100                 | 1                    |
| LIPEX®SMP™             | 0           | 100                 | 1                    |
