■ Emollients – Solid Butter

INCI NAME: HYDROGENATED VEGETABLE OIL

LIPEX[®] SMP[™]

This versatile, oxidative-stable, solid emollient offers a sharp melting profile for achieving unique texture transformations.

Lipex SMP is a highly versatile, oxidative stable solid emollient with a sharp melting profile and excellent crystallinity. It combines a silky-smooth richness with a soft-dry skin feel to offer unique texture transformations in face, hand, and body care formulations. Suitable for both emulsion and anhydrous-based systems, it is an excellent base for creating aerated products and is also an efficient texturizer for cosmetic pencils, sticks, and crayons.

Recommended applications: skin care, makeup, cosmetic stick and pencil formulations

Appearance: white, waxy, sharp-melting solid

Slip melting point: 35 °C

Solid fat content at 35 °C: 4%

Oxidative stability index: >100 hours at 110 °C

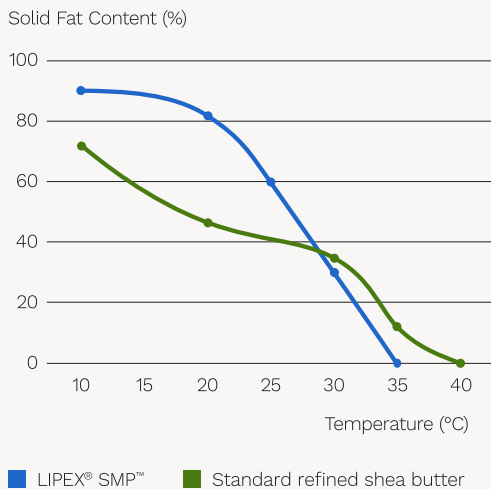

Certifications: COSMOS Approved, China Compliant, Halal, Kosher, Vegan-friendly

LIPEX[®] SMP[™]

Key features and benefits:

- Solid at room temperature, it transforms rapidly to a low viscosity liquid at body temperature with the potential to provide a cooling sensation when melting.
- Rapid solidification and excellent crystallinity combined with high oxidative stability ensure the final formulation has a long shelf-life.
- Compatible with natural and synthetic waxes, liquid vegetable oils, esters, pigments and fillers, Lipex SMP is an efficient texturizer for cosmetic pencils, sticks, and crayons. It delivers a smooth, rich pay-off with a dry film on application. NB: Lipex SMP offers limited mixability with tropical butter and long-chain fats.
- The sharp melting profile delivers innovative texture transformations.
