To whom it may concern,

Status KKDIK and SEA of cosmetic ingredients from AAK

Turkey will implement a new chemical legislation called KKDIK and SEA. The legislation is a mirror of the EU REACH. As a primary producer of cosmetic ingredients AAK is actively pursuing the necessary steps to ensure that the ingredients sold to cosmetic application comply with the KKDIK and SEA-regulations for selected products.

Many of the AAK ingredients are exempted while other require registration. This document shows the status of AAK products sold to the cosmetic industry. The products in appendix 1-3 are exempted. AAK has preregistered three substances covering the products in appendix 4. The registration process of these substances will be completed according to the legal requirements.

The details for the AAK cosmetic ingredients are given in the appendices.

Appendix 2: Ingredients exempted from registration as defined as “Glycerides, C16-C18 saturated, C18 unsaturated”.

“Glycerides, C16-C18 saturated, C18 unsaturated”, CAS no: 67701-30-8, EC 266-948-4:

Requisites for inclusion in this category:

- ☐ >80 % of fatty acids are C16-C18 saturated, C18-unsaturated
- ☐ Fatty acids other than C16-C18 saturated, C18-unsaturated: no individual fatty acid present at concentrations >2.0%
- ☐ No single non-glyceride component > 10.0%

The following ingredients will not be registered as they comply with the definition of “Glycerides, C16-C18 saturated, C18 unsaturated” thus fulfill the criteria for SDA 11 in EU REACH and exemption from registration
