6 August 2025

To whom it may concern,

UK-REACH status (according to Regulation UK 2019/758) of cosmetic ingredients from AAK

As a primary producer of cosmetic ingredients AAK is actively pursuing the necessary steps to ensure that the ingredients sold to cosmetic application comply with the UK-REACH-regulation.

Many of the AAK ingredients are exempted while other require notification prior to October 2021 and later (within 2-6 years from notification) a registration. The DUIN numbers represents the notification numbers. For exempted products, the DUIN number is not required.

This document shows the status of AAK products sold to the cosmetic industry.

The details for the AAK cosmetic ingredients are given in the appendices.

Appendix 2: Ingredients exempted from registration – modified Glycerides

"Glycerides, C16-C18 saturated, C18 unsaturated", CAS no: 67701-30-8, EC 266-948-4: Requisites for inclusion in this category:

- >80 % of fatty acids are C16-C18 saturated, C18-unsaturated
- Fatty acids other than C16-C18 saturated, C18-unsaturated: no individual fatty acid present at concentrations >2.0%
- No single non-glyceride component > 10.0%

The following ingredients will not be registered as they comply with the definition of "Glycerides, C16-C18 saturated, C18 unsaturated" thus fulfill the criteria for exemption from registration
